1) An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. M. Martin on 1/10/2006.

The application has been amended as follows:

Specification, page 1, below The Title enter:

- This application is a DIV of application 10/261,026 filed on 30 September 2002 -

Claim 3, step b) insert - the - in front of "creping cylinder".

Claim 3, step c) replace "the fluorescent signal" with - a fluorescent signal -.

Claim 4, step c) replace "the fluorescent signal" with - a fluorescent signal -.

Claim 5, step c) replace "the fluorescent signal" with - a fluorescent signal -.

Claim 5, step c) replace "the felt" with - a felt -.

2) The following is an examiner's statement of reasons for allowance:

The primary reason for allowance is that the cited prior art does not show: a method that includes the creping of a tissue over a rotating drying cylinder, the cylinder being divided into a plurality of zones, each zone having a different performance requirement and operating temperature, and by means for targeted application of a non-gaseous performance enhancing material to each zone, applying the non-gaseous material to at least two of said zones, wherein the material is selected based on performance requirement and operating temperature range of each zone (claim 1); a

method that includes adding a known amount of an inert fluorescent tracer to a known amount of a performance enhancing material applied to a creping cylinder, measuring a signal generated by the fluorescent tracer, correlating the amount of the tracer with the amount of the material present on the cylinder, and comparing with the desired amount of the material adjusting the amount of the material on the cylinder (claim 3); a method that includes adding a known amount of an inert fluorescent tracer to a known amount of a performance enhancing material applied to a creping cylinder, by means of a fluorometer measure the fluorescent signal of said fluorescent tracer on a creped tissue, and repeating the measurement determine the pattern and presence of the material on said creped tissue to ascertain and adjust the amount of said material on the creping cylinder (claim 4); a method that includes adding a known amount of an inert fluorescent tracer to a known amount of a performance enhancing material applied to a creping cylinder, by means of a fluorometer measure the fluorescent signal of the tracer in collected water removed from a felt supporting a tissue to ascertain and adjust the amount of said material on the creping cylinder (claim 5).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

3) Any inquiry concerning this communication or earlier communications from the examiner should be directed to Mark Halpern whose telephone number is 571-272-1190.
